## THESAURVS LINGVAE LATINAE

1900 ff. Special price for all fascicles published up to and including 2001, including Index and Praemonenda: € 5,800.00. ISBN 3-598-70001-6

(All volumes and fascicles can also be purchased individually)

This "Treasure chamber of Latin language" is not only the largest dictionary of classical Latin, it puts our knowledge of classical antiquity on a completely different footing:

- it was developed upon the basis of all existing classical Latin texts (until 600 A.D.), both literary and non-literary
- it offers all collected references for rare words, and an instructive, representative selection for the rest, (marked with a ■)
- it lists all meanings (including meanings specific to the terminology of particular fields) and all constructions
- it documents peculiarities of inflection, spelling and prosody
- it provides information on the etymology of each Latin word and its survival in Romance languages
- it compiles comments from Antiquity referring to the respective terms

In most cases the examples from classical texts are presented with so much context, that it is unnecessary for the user to turn to the original editions; however, should it be necessary, the references are so precise that they can be verified with ease – the reliable tool for doing so being the Index libro-rum.

For every Latin term the Thesaurus offers a comprehensive, richly documented presentation of its possible uses and its history – for scholars of the various specialist fields of classical studies and of related disciplines.

For this reason the Thesaurus (an international project by 26 academies from no less than 19 countries and 3 continents) represents an essential, universal philological tool.

“ In summary it must be emphasized that the first electronic edition of the Thesaurus linguae Latinae is a great success, offering much easier access to the largest classical Latin dictionary, making new working methods possible and not least continuing the mammoth work, started in the 19th century, in an age influenced to an ever increasing degree by digital technology. Transforming the material into new media (today the CD-ROM, in the near future perhaps access via the WWW or later, another form of media) secures this knowledge, based ultimately on the excerpts of Latin texts, produced with untiring diligence, with which the actual work on the Thesaurus began at the start of the 20th century. This CD-ROM version provides the chance to increase the usefulness of this lexicon quite considerably. ”

Excerpt from: Review of TLL 1 by Henning Lühken; Göttinger Forum für Altertumswissenschaft

## THESAURVS LINGVAE LATINAE (TLL 2)

CD-ROM edition 2003. € 940.00

(Special price for purchasers of the book edition: € 750.00)  
(Update price for purchasers of CD-ROM edition TLL 1: € 680.00)  
(Update price for purchasers of the book edition and CD-ROM edition TLL 1: € 550.00). ISBN 3-598-40769-6

In addition to the well-established book edition of the Thesaurus, a CD version with identical text is now available. The CD offers optimal access to this outstanding work, making it clearer, easier to read, and answering questions more quickly – some of which can only now be asked of the lexicon at all.

The printed text has not only been reproduced electronically, it has also been very thoroughly coded. In addition, special software was developed. Besides having the full text search at his or her disposal, the user may choose between a wealth of access, search and navigation possibilities, e.g.:

- calling up a particular passage in the Thesaurus through selecting the volume, column and line number
- calling up a particular article via lemma list or entering the lemma
- search if and where a particular reference occurs in an article (via alphabetically arranged *citation view*)
- calling up an outline of the structure of a particular Thesaurus article (*outline view*)
- details of a **citation** through simply clicking
- calling up an **internal Thesaurus cross-reference** through simply clicking
- search in individual sections of the Thesaurus article (e.g. the article heading or parts thereof)

The 2nd CD-ROM edition covers all articles of the dictionary starting with the letter F published until the end of 2002: these are the words from the letters F to M, O and P to pictio– and porta to propos. This means that 89 of the 154 fascicles published until then are now available in electronic form.

The list of citations, the *Index librorum*, is also integrated in the CD-ROM. Hyperlinks lead from the references in the articles to the entries in the *Index*. In addition, the *Index* on the CD-ROM can be used 'like a book'.

The electronic publication of all parts of the Thesaurus printed until now (A to M, O, P) will be completed with **TLL 3** (planned for the end of 2004). Further versions of the **CD-ROM TLL** will then systematically cover the respective letters planned for the coming years.
